Dr. Edward N. Tihen (1924-1991) was an avid reader and researcher of Wichita newspapers. His notes from Wichita newspapers -- the "Tihen Notes," as we call them -- provide an excellent starting point for further research. They present brief synopses of newspaper articles, identify the newspaper -- Eagle, Beacon or Eagle-Beacon -- in which the stories first appeared, and give exact references to the pages on which the articles are found. Microfilmed copies of these newspapers are available at the Wichita State University Libraries, the Wichita Public Library, or by interlibrary loan from the Kansas State Historical Society.

Subject(s): Coleman Company

3. The Hydro-Carbon Light company, 311-313 North Main street, has purchased from Dr. E. E. Hamilton, the second 50 feet north of the Western Planing Mill company's factory on St. Francis for \$3400 to be used as a site upon which a \$20,000 factory will be erected. The company started in Wichita seven years ago and has outgrown its present quarters. The new building will be 50 by 140 foot and four stories high. ¶ The company was incorporated a year ago with a capital of \$26,000. W. R. Dulaney is president, J. F. Shearman vice-president, and W. C. Coleman, secretary, treasurer, and general manager.

6. The United Millwork Company has purchased two lots north of its plant in second block on North St. Francis and will use it for a lumber shed. In connection with this the present 75 foot frame shed will be torn down and replaced with a brick building, giving the company a 225 foot frontage on St. Francis. ¶ The Coleman Lamp Company has purchased another tract of ground 100 by 140 feet in same block, which will be covered by a one and two story brick building. The new building will be east of the alley and just north of a building the company erected last year. Three months ago the company let a contract for a two story building facing on St. Francis just north of its main factory and office building. This building is not yet completed, but already more room is needed by the company.

page

7. The Coleman Lamp Company will start at once to erect an addition, two stories, 60 by 90 feet, overlooking the alley east of St. Francis and extending 90 feet north of the present factory building. Building will contain an auditorium on the second floor. To cost \$60,000. Details.

Friday, July 31, 1925 page

13. Another four story unit is to be added to the Coleman Lamp Company's plant on North St. Francis, extending from the present building north to the old church on the corner of 2nd and St. Francis. The tower of the church is in the way of the construction and is being torn down. Addition to be 60 by 90 feet and cost about \$60,000.

Monday, August 31, 1925 page

6. The Coleman Lamp Company has purchase a tract of ground 132 by 150 feet between 1st and 2nd and between Mead and Moore streets and has let a contract to John M. Denny to put up a factory building at once.

Monday, November 30, 1925 page

3. The Coleman Lamp Company is planning to build another unit of its plant soon. It will be on the site once used for a tennis court on 2nd Street at the rear of the old Catholic Church, extending from the alley to the Santa Fe right-of-way. To be four stories, 60 by 130 feet, and cost \$125,000. The contractor will be John M. Denny, who has already built several buildings for the Coleman Company. He has now completed the exterior of the new four story administration building, 60 by 90 feet, with entrance on St. Francis Avenue, and is at work on the interior. This building will cost about \$60,000. Later the old Catholic Church, which stands on the corner, will be torn down and replaced by another four story Coleman Company building.

Monday, August 9, 1926 page

10. The Coleman Lamp Company is taking steps toward the building of the last unit of its plant in the second block of North St. Francis. Bids are being asked for the wrecking of the old Catholic church building which occupies the southeast corner of 2nd and St. Francis; this will than be replaced by the final unit of the company's plant, four stories, and 60 by 140 feet, at cost of approximately \$60,000.
